Professional Summary

Senior Backend Engineer with 8 years of experience architecting distributed systems, asynchronous event pipelines, and REST APIs using Python, FastAPI, Django, and Redis. Passionate about query optimization and microservice resiliency.

Technical Skills

Python, FastAPI, Django, PostgreSQL, Redis, Docker, Kubernetes, AWS, Kafka, Celery, Microservices

Work Experience

Lead Python Engineer — *Apex Cloud Systems (2021 - Present (4 years))*

Architected event-driven pipelines processing 15M daily events in Python & Kafka. Reduced database query latency by 45%.

Senior Backend Developer — *FinTech Nexus (2018 - 2021 (3 years))*

Developed PCI-compliant REST APIs in FastAPI with PostgreSQL, maintaining 99.99% uptime across payment gateways.

Software Engineer — *DataStream Inc (2016 - 2018 (2 years))*

Built automated data ingestion batch scripts in Python and Flask.

Education

B.S. in Computer Science - University of California, Berkeley (2016)
